

Product datasheet PS016

MONOSAN[®]

Polyclonal Rabbit anti-Interleukin-10

Clone no. -

MONOSAN

Product name	Polyclonal Rabbit anti-Interleukin-10
Host	Rabbit
Applications	IHC-fr,FUNC,ELISA,IF,IHC-P,WB
Species reactivity	human
Conjugate	-
Immunogen	Unknown or proprietary to MONOSAN and/or its suppliers
Isotype	Ig
Clonality	Polyclonal
Clone number	-
Size	1 ml
Concentration	100 ug/ ml
Format	-
Storage buffer	PBS with 0.1% BSA and 0.02% sodium azide
Storage until expiry date	2-8°C

FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC PROCEDURES

Polyclonal Rabbit anti-Interleukin-10

Clone no. -

MONOSAN

Additional info

The antibody reacts with human Interleukin-10 (IL-10) of both natural and recombinant origin. IL-10 is a pluripotent cytokine with important immunosuppressive actions: it can inhibit cytokines involved in the Th1 response such as IL-2, Interferon gamma and also inhibits the production of pro-inflammatory cytokines such as IL-1, IL-6, IL-8 and TNF-alpha. The antibody inhibits the biological activity of natural and recombinant human IL-10. The antigen specificity was further assessed by ELISA. No cross reactivities with other cytokines have been detected.
